Contents

End-to-end testing:.....	2
Backend testing:.....	3
User acceptance test:.....	3
ahmed harbi.....	11

End-to-end testing:

The front end is being test with a help of third party library cypress.

The main reason of E2E testing is to simulate the end user experience and mimic the scenarios expected to occur to realise if something went wrong (as a final step) before actually deploying the application.

Backend testing:

The main reason of doing unit tests is to specifically check whether all the functions of a class works as intended and that the whole logic does what it does in the way it is expected to be.

In the backend there different type of unit tests:

- Unit tests for Model classes
- Unit tests for Data transfer object classes (DTO)
- Unit tests using Mockito (external library facilitate process of testing interfaces)
- Unit tests to test the existences of the controllers

Integration testing:

The main reason of using IT is to test service object classes that use data access layer interfaces

- Integration test: to test the HTTP request (testing JWT generation, get some expected results from controllers using the header authorization (BEARER {auto generated JWT})).

User acceptance test:

The test cases demonstrate the what the functionality is, the scenario or the condition and the expected results for each function.

Abbreviations

- TCA: Test case regarding (Admin) privileges
- TCS: Test case regarding (student) privileges
- TCT: Test case regarding (Teacher) privileges

sprint	ID	Function name	Pre-condition	Used data	Expected results	actual implementation results

5	TCA-09	After an admin signs up a student, an automated email is sent to the signed up student.	<p>The admin was in his main page</p> <p>The admin presses on the add student section</p> <p>The admin fills in all the student details</p> <p>The admin</p>	<p>First name: “Mohammed”</p> <p>Last name: “Harbi”</p> <p>Date of birth: 24-07-1995</p> <p>Email: Mohammedalharbi000@gmail.com</p>	<p>Mohammed receives an automated email containing random username and password</p> <p>And is able to login with the student profile in henaknowledge</p>	The functionality is working properly with no bugs.

			presses on add button			
5	TCA-10	After an admin signs up a teacher , an automated email is sent to the signed up teacher .	<p>The admin was in his main page</p> <p>The admin presses on the add teacher section</p> <p>The admin fills in all the teacher details</p> <p>The admin presses on add button</p>	<p>First name: "Mohammed"</p> <p>Last name: "Harbi"</p> <p>Date of birth: 24-07-1995</p> <p>Email: Mohammedalharbi000@gmail.com</p> <p>Specialization: Front end developer</p>	<p>Mohammed receives an automated email containing random username and password</p> <p>And is able to login with the teacher profile in henaknowledge</p>	The functionality is working properly with no bugs.
5	TCA-11	The admin is informed with some help in signing up a student	<p>The admin was in his main page</p> <p>The admin clicks on the signing up a student navigation link</p> <p>The</p>		A pop up appears indicating some help regarding what is going to happen.	The functionality is working properly with no bugs.

			admin clicks on help button			
5	TCA-12	The admin is able to logout	<p>The admin was in his main page</p> <p>The admin clicks on the log out navigation link</p>		The admin is redirected back to the main logging in page	The functionality is working properly with no bugs.
5	TCS-02	The student finds his information already written in the update student profile section	<p>The student was in his main page</p> <p>The student clicks on the update profile personal information navigation link</p>		The student sees his personal information pre-written	The functionality is working properly with no bugs.
5	TCT-02	The teacher finds his information already written in the update teacher profile section	<p>The teacher was in his main page</p> <p>The teacher clicks on the update</p>		The teacher sees his personal information pre-written	The functionality is working properly with no bugs.

			profile personal informatio n navigatio n link			
5	TCS-03	The student is able to see a generated unique code to redeem his points	The student in his main page The student clicks on the points navigation link		The student is able to see a unique code	The functionality is working properly with no bugs.
5	TCS-04	The student is able to search on teachers for contacting	The student in his main page The student clicks on the contact navigation link	search: ahmed harbi	The student is able to see the teacher ahmed Harbi card and able to contact him	The functionality is working properly with no bugs.
5	TCS-05	The student is able to filter searching teachers by specialization	The student in his main page The student clicks on the contact navigation link Clicks on the database		The student is able to see all the teachers with the specialization database management	The functionality is working properly with no bugs.

			managem ent button			
5	TCS-06	The student is able to share an experience	<p>The student in his main page</p> <p>The student clicks on share experience navigation link</p> <p>The student fills in all the experience details and clicks on share button</p>	<p>Title : “a test”</p> <p>Description: “this is to test the new Henaknowledge feature of sharing experiences!”</p>	All the students and teachers of Henaknowledge are able to see the shared experience	The functionality is working properly with no bugs.
5	TCS-07	The student is able to check out all the shared experiences	<p>The student in his main page</p> <p>The student clicks on experience navigation link</p> <p>The student clicks on “a test” experience card</p>		The student is able to see the title, able to like or dislike, able to see the description, add a comment and read all the comments against the chosen experience	The functionality is working 95% with small bug on liking and disliking feature (the person can only like or dislike once but the bug occurs because of not updated state of the liking and disliking)

5	TCS-08	The student is able to like a shared experience	<p>The student in his main page</p> <p>The student clicks on experience navigation link</p> <p>The student clicks on "a test" experience card</p> <p>The student clicks on like thumb up icon</p>		<p>The student sees a title "test"</p> <p>Description "this is to test the new henaknowledge feature of sharing experiences!"</p> <p>And the number of likes has been increased from 0 to 1</p>	The functionality is working 95% with small bug on liking and disliking feature (the person can only like or dislike once but the bug occurs because of not updated state of the liking and disliking)
5	TCS-09	The student is able to dislike a shared experience	<p>The student in his main page</p> <p>The student clicks on experience navigation link</p> <p>The student clicks on "a test" experience card</p>		<p>The student sees a title "test"</p> <p>Description "this is to test the new henaknowledge feature of sharing experiences!"</p>	The functionality is working 95% with small bug on liking and disliking feature (the person can only like or dislike once but the bug occurs because of not updated state of the liking and

			The student clicks on dislike thump down icon		And the number of like has been decreased from 1 to 0 And the number of dislikes has been increased 0 to 1	disliking)
5	TCS-10	The student is able to contact a teacher	<p>The student on his main page</p> <p>The student clicks on contact navigation link</p> <p>The student clicks on contact a teacher</p> <p>The student is able to send a question to the specified teacher</p>		a empty field appears where student can send the question and once the teacher have replied the student can mark it as useful or not useful	Has not been implemented yet
5	TCT-03	The teacher is able to check his	The teacher on his main		The teacher is able to see his	The functionality is working properly

		own points	page The teacher clicks on the navigation link your points		own points	with no bugs.
5	TCT-04	The teacher is able to see a unique for his points	The teacher on his main page The teacher clicks on the navigation link your points		The teacher is able to see a unique code to redeem his points	The functionality is working properly with no bugs.
5	TCT-05	The teacher is able to share his own experience	The teacher on his main page The teacher clicks on share experience navigation link	Title : "a test from a teacher" Description: "this is to test the new Henaknowledge feature of sharing experiences!"	All the students and teachers of Henaknowledge are able to see the shared experience	The functionality is working properly with no bugs.
5	TCT-06	The teacher is able to check out	The teacher in his main page		The teacher is able to see the	The functionality is working 95% with

		other experiences	<p>The teacher clicks on experience navigation link</p> <p>The teacher clicks on "a test from a teacher" experience card</p>		<p>title, able to like or dislike, able to see the description, add a comment and read all the comments against the chosen experience</p>	<p>small bug on liking and disliking feature (the person can only like or dislike once but the bug occurs because of not updated state of the liking and disliking)</p>
5	TCT-07	The teacher is able to like an experience	<p>The teacher in his main page</p> <p>The teacher clicks on experience navigation link</p> <p>The teacher clicks on "a test from a teacher" experience card</p> <p>The teacher clicks on like button</p>		<p>The like has been increased from 0 to 1,</p> <p>The like thump up icon indicates that the teacher has liked this experience</p>	<p>The functionality is working 95% with small bug on liking and disliking feature (the person can only like or dislike once but the bug occurs because of not updated state of the liking and disliking)</p>

5	TCT-08	The teacher is able to dislike an experience	<p>The teacher in his main page</p> <p>The teacher clicks on experience navigation link</p> <p>The teacher clicks on "a test from a teacher" experience card</p> <p>The teacher clicks on like button</p>		<p>the dislike has been increased from 0 to 1,</p> <p>the like has been decreased from 1 to 0,</p> <p>The like thumb up icon indicates that the teacher has liked this experience</p>	The functionality is working 95% with small bug on liking and disliking feature (the person can only like or dislike once but the bug occurs because of not updated state of the liking and disliking)
5	TCT-09	The teacher is able to logout from main page	<p>The teacher on his main page</p> <p>The teacher clicks on the logout navigation link</p>		<p>The teacher is logged out and redirected to the main landing page</p>	The functionality is working properly with no bugs.
5	TCT-10	The teacher is able to login to his profile	The teacher is in the login form		The teacher is logged in to the teacher profile	The functionality is working properly with no bugs.

			The teacher enters the unique username and password received in their email			
5	TCT-11	The teacher is able to answer student questions	<p>The teacher in his main page</p> <p>The teacher clicks on the questions navigation link</p> <p>The teacher clicks on the question that has been a student</p> <p>The teacher types the answer and clicks on send answer</p>	<p>question: "what kind of database types are there? "</p> <p>answer: "primitive types and there are specific types, for example MySQL has specific mysql database types so on so fourth"</p>	The teacher would be informed that his answer is waiting to be assessed by the student and if the student mark it as useful, it appears in the useful column.	Has not been implemented yet
5	TCS-11	The student is able to login to his profile	The student is in the login form		The student is logged in to the student profile	The functionality is working properly with no bugs.

			The student enters the unique username and password received in their email			
5	TCA-13	The admin is able to login to his profile	<p>The admin is in the login form</p> <p>The admin enters his pre-made account details</p>		The admin is logged in in the admin profile	The functionality is working properly with no bugs.
5	TCA-14	The admin is able to register other admins	<p>The admin in his main page</p> <p>The admin clicks on the add admin navigation link</p> <p>Fills in all the details and clicks on add</p>	<p>Firstname: "Jalio"</p> <p>Lastname: "kirlo"</p> <p>Date of birth:19-06-1970</p>	Jalio receives an automatic email containing unique credentials.	<p>The functionality is added in backend.</p> <p>The functionality has not yet been added to the frontend.</p>
5	TCT-12	The teacher is able to comment in an	The teacher opens his main page	comment: "this is a good experience, keep up the good work"	The teacher would be able to see his	The functionality is working properly with no

		experience	<p>The teacher clicks on experiences</p> <p>Chooses an experience</p> <p>Go to comment section</p> <p>Add a comment</p>		comment being posted in the comment section of the experience.	bugs.
5	TCA-15	The admin is able to check the activity of the students and teachers	<p>The admin on his main page</p> <p>The admin clicks on the activity navigation link</p>		The admin is able to see teachers and students and their activity in using henaknowledge	Has not been implemented
5	TCA-16	The admin is able to check the statistics	<p>The admin on his main page</p> <p>The admin clicks on the statistics navigation link</p>		The admin is able to see the statistics of henaknowledge in terms of activity experiences likes dislikes extra..	Has not been implemented
5	TCA-17	The admin	The		The	Has not

		is able to control some of the styling and options in henaknowledge	admin on his main page The admin clicks on the settings navigation link		admin is able to see the dashboard and change settings, then these would be taken place to all users of henaknowledge.	been implemented yet
